Exp.No:5 Experiments on Packet Capture tool: Wireshark.

Aim: Experiments on Packet Capture tool: wireshark.

Capturing and Analysing Packets using Wireshark tool

To filter capture, view, packets in Wireshark tool.
Capture 100 packets from the Ethernet: IEEE 802.3 LAN Interface and save it.

Procedure:

1. Select local Area Connection in Wireshark
2. Go to capture option
3. Select stop capture automatically after 100 packets
4. Then click start capture
5. Save the packets.

1. Create a Filter to display only TCP/UDP packets inspect the packets and provide the flow graph.

=> Select local Area Connection in wireshark
=> Go to capture option
=> Sekt stop capture automatically after 100 packets
=> Then click start capture.
=> Search TCP packets in search bar.
=> To see flow graph click statistics.

2. Create a Filter to display only APP packets and inspect the packets. Procedure

=> Go to Capture Option
=> Select stop capture automatically after 100 packets
=> Then start.

=> Search ARP packets in search bar.

3. Create a Filter to display only DNS packets and provide the flow graph.

=> Go to capture option
=> Select stop capture
=> Click start
=> search DNS
=> To see flow graph click statistics.

4. Create a Filter to display only HTTP packets and inspect the packets procedure.

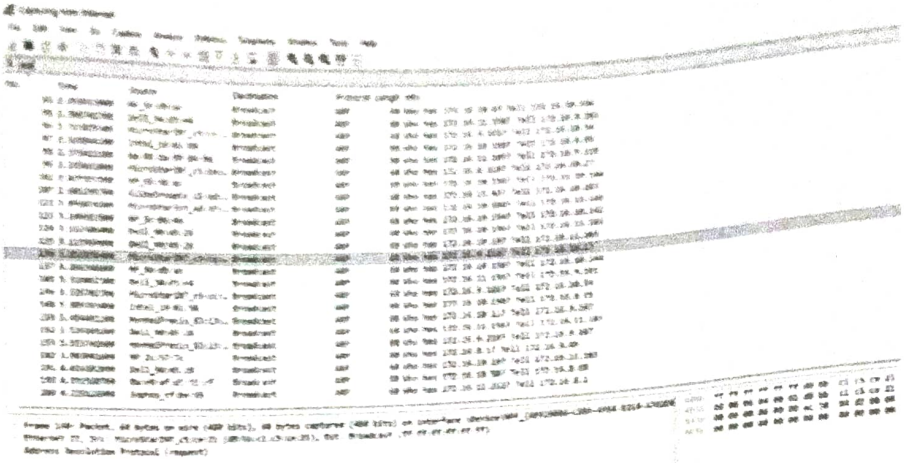

=> Select local Area Connection in Wireshark
=> Go to Capture
=> Click start
=> Search HTTP
=> Save packets

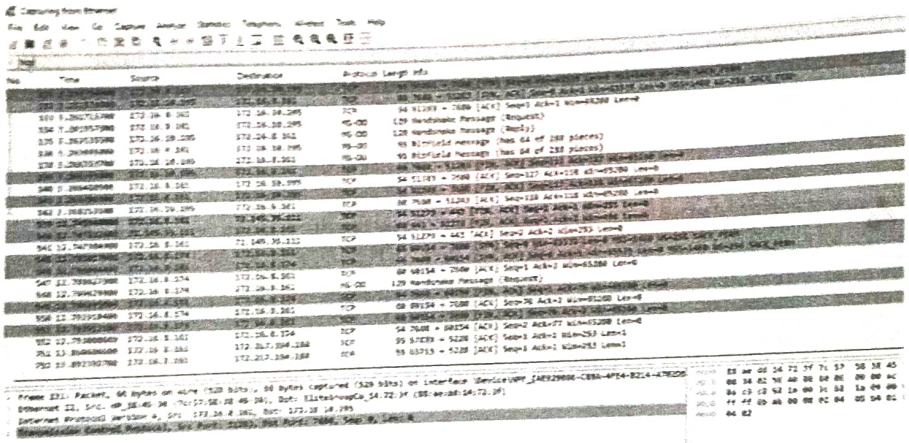

5. Create a Filter to display only IP/ ICMP Packets and inspect the packets.

=> Select Local Area Connection in Wireshark
=> Go to capture
=> Select stop
=> Select start capture
=> Search ICMP / IP packets

6. Create a Filter to display only DHCP packets and inspect the packets.

=> Select local Area Connection
=> Go to capture
=> Select stop
=> Then click start
=> Search DHCP
=> Save packets

Result:

Thus, Different network protocols were successfully captured, filtered, and analyzed using wireshark.
